SUMMARY

Computer Science undergraduate with hands-on experience in backend development using FastAPI, Django, Flask, REST APIs, SQL, and Docker, along with frontend exposure to React.js. Developed authentication systems and data-driven applications with a strong foundation in Data Structures & Algorithms, DBMS, and Operating Systems. Seeking software engineering opportunities to build scalable web and AI-enabled applications.

EDUCATION

RAJEEV INSTITUTE OF TECHNOLOGY

Bachelor of Engineering in Computer Science and Engineering
CGPA – 8

Hassan, India

2022 - 2026

GOVERNMENT PU COLLEGE (Karnataka State Board)

Class 12th Score – 79.16%

Hassan, India

2022

S.G.R PUBLIC SCHOOL

Class 10th Score - 82.08%

Hassan, India

2020

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java (Basics), JavaScript (Basics)

Backend Development: FastAPI, Django, Flask, REST APIs

Frontend: React.js, Node.js, HTML, CSS

Artificial Intelligence: Machine Learning, Generative AI

Databases: PostgreSQL, MySQL, MongoDB

Data structures: Power BI, TAX, Microsoft Excel

Developer Tools: GitHub, Docker, Postman, VS Code, Google AI Studio

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems

INTERNSHIP/ INVOLVEMENT

Software Development Intern – Mind Matrix (VTU MoU Partner):

- Contributed to software application development during a 4-month internship using modern development frameworks.
- Integrated **Generative AI** capabilities using **Google AI Studio** to enhance application functionality.

PROJECTS

Real-Time Unauthorized Login Detection and Alert System :

- Developed a **Python** and **Flask**-based authentication monitoring system to detect unauthorized login attempts.
- Implemented **SQL**-based logging to identify suspicious login patterns, including multiple failed login attempts and abnormal access behavior.

AI Self-Healing Test Automation Framework : Playwright, Python, AI/ML

- Developed an **AI-powered test automation** framework that automatically detects changed web elements and repairs broken locators to keep automated tests running.
- Implemented DOM analysis and element similarity matching to identify replacement elements when application UI/DOM structures change.

ADDITIONAL INFORMATION

Courses & Certifications:

- Infosys Springboard: [Python Fundamental](#) , and [Artificial Intelligence and Machine Learning](#)
- Prep Insta: [Machine Learning & Artificial Intelligence](#) , and [Data science](#)
- IBM: [Getting Started with Artificial Intelligence](#)
- Anthropic courses: [Claude 101](#)
